

Bankroll simulation following every pick of the system

GP Simulador · World Cup 2026 · settled picks from 2026-06-30 to 2026-07-06 · generated 2026-07-07

Scenario: a user deposits the starting capital on June 30 and follows EVERY pick published by the system, with the exact staking rule of the platform calculator. Record: **31 settled picks** (22 won, 5 lost, 4 voided with stake returned). Hit rate: **81.5%**.

Results by scenario

\$5,000 · KELLY 1/4

\$7,607.26

Profit \$2,607.26 (+52.1%) · max drawdown 6.7%

\$5,000 · KELLY 1/2

\$8,889.51

Profit \$3,889.51 (+77.8%) · max drawdown 8.4%

\$10,000 · KELLY 1/4

\$15,214.55

Profit \$5,214.55 (+52.1%) · max drawdown 6.7%

\$10,000 · KELLY 1/2

\$17,779.02

Profit \$7,779.02 (+77.8%) · max drawdown 8.4%

Staking is percentage based, which is why the % return is identical with \$5,000 and \$10,000: profit scales with capital.

Methodology

- **Staking rule (the platform calculator rule):** with a value edge, fractional Kelly (1/2 or 1/4) hard capped at 5% of bankroll; with no edge (efficient market), flat stake of 8% times the chosen fraction (4% at 1/2, 2% at 1/4), same cap.
- **Probability used:** the GP model probability of each pick (for combos, the combined confidence).
- **Sequencing:** picks from the same match are staked together from the current bankroll; matches are processed in kickoff order and settled before the next one. Profits are reinvested (compounding).
- **Odds:** the best odds recorded by the system when the pick was published (across monitored books).
- **Exclusions:** internally superseded picks do not count; voided picks (matches decided in extra time or penalties) return the stake; currently active picks are not included.

Pick by pick detail · \$5,000 with Kelly 1/4

DATE	MATCH	PICK	ODDS	RESULT	STAKE	P&L	BANKROLL
